

## Biography

Dr. Mohssin Zekriti is a physics professor at the “Euro-Mediterranean University of Fès”, where he is leading the “Label-Free Optofluidic biosensors” research team. He received his PhD diploma in Materials Science and Modelization from Mohammed V University in Rabat in 2013. During his PhD work carried out at the Moroccan Foundation of Advanced Science, Research and Innovation (MAScIR), he worked on the development of optical biosensors based on Surface Plasmon Resonance. In 2014, he is selected as Special Appointed Resereach in the International Joint Research Promotion Program in the Osaka University. He is also author of several research articles and presentations at National and International conferences.
